3rd edition of the technical days

EMERGENCY INTERVENTIONS ON VEHICLES

PARTICIPANT’S GUIDE

MAY 16, 17 & 18 2018

In partnership with:

With the support of:
INTRODUCTION

New energies (electric, hybrid, gas) and new technologies (airbags, reinforcements, glazing, etc.) are important developments in the "vehicle" sector. Emergency intervention on vehicles (IUV) is today, and even more so tomorrow, a real challenge for emergency services. In the context of interventions for traffic accidents or vehicle fires, fire brigades must adapt their techniques and equipment.

The SDIS 86, aware of these challenges, has initiated a proactive approach since 2005, in partnership with automobile manufacturers and manufacturers of road rescue equipment. An intervention protocol has been drawn up and training courses are given at the Vienna Fire Training Centre.

In parallel to this approach, SDIS 86, in partnership with SDIS44, the National School of Fire Brigade Officers and the Fédération nationale des sapeurs-pompiers de France, the Directorate General of Civil Security and Crisis Management, the International Fire Technical Committee and the support of Weber-Rescue Systems and Renault, organised technical days on its site at the training centre in 2014 and 2016.

At the last edition, nearly 450 people (participants, exhibitors, speakers, etc.) from 58 French departments and 14 different countries were present to attend the conferences, workshops and scheduled trials.

In view of the success of these technical days, SDIS 86 has decided to renew the organization of this international event and would be happy to count you among its participants.

WEDNESDAY 16 MAY 2018 TO 1:30 PM
INAUGURATION AND PRESENTATION OF THE NEW TECHNICAL PLATFORM "EMERGENCY VEHICLE RESPONSE" OF THE SDIS DE LA VIENNE
The 3rd edition of the Technical Days "Emergency Intervention on Vehicles" will take place on 16, 17 and 18 May 2018 at the site of the Vienna Fire Training Centre.

For this 3rd edition of the technical days, different sectors of activity will be developed:
In partnership with WeberRescue Systems, the participants will take part in various thematic workshops (new technology vehicles, Cross-Raming, PL vehicles, buses, etc.) supervised by European trainers.

New workshops will be offered, including a CARAMBOLAGE workshop.
SECTOR CONFERENCES / DEMONSTRATIONS

ROOM CONFERENCES:

On defined themes, international specialists will draw up an inventory of their work, their practices and future developments.

For this 3rd edition, in partnership with the magazine "Mobility Magazine", specific conferences for fleet managers of public transport vehicles will be proposed on Thursday 17 May on topics such as safety on electric buses, CNG,...

FIRE CONFERENCES:

Vehicle fire tests will be carried out. The opportunity to discover, in practice, the protocol for emergency intervention on vehicles.
DYNAMIC DEMONSTRATIONS AND WORKSHOPS:

These demonstrations and workshops will be an opportunity to discover new innovations in the field of emergency intervention on vehicles (technology, decision-support tools, digital solutions, teaching materials, etc.).
EXHIBITOR SECTOR

EXTRICATION MATERIALS:

In the outdoor area, the different manufacturers of rescue equipment will present their tools and innovations. Vehicles will be made available to discover and test the equipment.

ROAD RESCUE RESPONSE EQUIPMENT:

In the interior space, all the tools necessary for road rescue operations will be present (individual and collective protection equipment, glazing management tools, tools for extracting victims, markings, lighting, etc.).

ROAD RESCUE VEHICLES:

In outdoor areas, the equipment manufacturers of road rescue vehicles will present their ranges and new products (VSR, FPTSR, CCRSR,...)

For this 3rd edition, a theme day entitled "BUYERS' DAY" will be proposed on Thursday, May 17. Thematic workshops, demonstrations, workshops of exchanges,... will allow buyers of SDIS to exchange with manufacturers and test the equipment presented.
